Education

Southern New Hampshire University, Bachelor of Arts in Digital Marketing (2020)

Mount Wachusett Community College, Associate of Science in Legal Studies (2015)

Certifications

AWS Certified Cloud Practitioner
Google Cloud Digital Leader
Lean Six Sigma
Certified Scrum Master (CSM)

SUMMARY

Governance, Risk, and Compliance (GRC) Specialist and Risk Management Framework (RMF) Subject Matter Expert with 7+ years of experience leading security, compliance, and risk management initiatives across federal, regulated, and high-growth environments. Deep expertise in frameworks including NIST RMF / SP 800-53 Rev. 5, NIST CSF, FedRAMP, and continuous authorization (cATO) programs. Known for translating complex regulatory requirements into scalable, automated, engineer-friendly compliance frameworks. Strong background in technical program management, audit readiness, automation, and cross-functional leadership.

EXPERIENCE

GRC SPECIALIST / RMF SUBJECT MATTER EXPERT

Aquia Inc. | 2024 - Present

- Served as the Risk Management Framework (RMF) Subject Matter Expert for a Continuous Authorization to Operate (cATO) program supporting the United States Patent and Trademark Office (USPTO), providing authoritative guidance on NIST SP 800-53 Rev. 5 interpretation, implementation, and assessment for cloud-based FISMA Moderate systems
- Advised on the transformation of a manual, documentation-centric ATO process into an automated, real-time compliance framework, reducing time-to-ATO by ~50% and freeing ~50% of security and engineering hours previously spent on manual evidence collection
- Consulted on the design and deployment of USPTO's first automated assessment capability, acting as RMF SME for control selection, mapping, and assessment logic, covering 2,784 AWS control mappings and leveraging AWS Audit Manager to replace manual assessment activities with API-driven automated evidence collection
- Leveraged secure AI-enabled capabilities to produce, review, and validate 2,784 control implementation statements aligned to individual automated assessment mappings, reducing an estimated 8 months of manual effort to 6 weeks while improving audit defensibility and assessor confidence
- Governed a comprehensive RMF-aligned control inheritance data model spanning 9 common control providers and 348 NIST 800-53 Moderate baseline controls
- Consulted on the design, documentation, and automation of 20+ RMF-aligned GRC workflows supporting continuous compliance, including control monitoring, evidence lifecycle management, POA&M governance, assessor response workflows, and authorization readiness across the full system lifecycle
- Partnered closely with engineering, platform, and security operations teams to translate regulatory requirements into system-aligned, automation-friendly implementations compatible with modern cloud and DevSecOps environments

EXPERIENCE (CONTINUED)

GRC SPECIALIST / RMF SUBJECT MATTER EXPERT (CONTINUED)

Aquia Inc. | 2024 - Present

- Serve as the primary RMF authority and technical liaison for assessors, auditors, and federal stakeholders, supporting automated assessment validation, risk articulation, control interpretation, and remediation planning
- Led, advised, and mentored a cross-functional GRC training team, setting curriculum strategy, delivery milestones, and quality standards while aligning technical enablement, knowledge management, and human-centric security training to RMF and cATO program objectives, ensuring agency-wide adoption and sustained operational competency

SENIOR PROJECT MANAGER

Mindex Technologies | 2023 - 2024

- Managed delivery of complex, multi-workstream software and compliance-adjacent initiatives across diverse client portfolios
- Led process improvement and operational maturity efforts in regulated and enterprise environments
- Coordinated cross-functional teams spanning engineering, security, product, and client stakeholders
- Implemented governance structures to improve delivery predictability, risk visibility, and accountability

TECHNICAL PROJECT MANAGER

ScaleSec | 2019 - 2023

- Led security and compliance programs for cloud-native and SaaS clients across FedRAMP, SOC 2, PCI DSS, and NIST CSF
- Drove gap assessments, remediation planning, and audit readiness from kickoff through authorization
- Acted as the primary liaison between clients, auditors, and engineering teams
- Built and scaled internal project management and delivery frameworks for a growing cloud security consultancy
- Oversaw portfolios of concurrent engagements while maintaining high client satisfaction and audit success rates

SKILLS

Skills & Competencies: Governance, Risk & Compliance (GRC) | Risk Management Framework (RMF) | Continuous Authorization to Operate (cATO) | NIST SP 800-53 Rev. 5 | NIST Cybersecurity Framework (CSF) | FedRAMP | SOC 2 | PCI DSS | GDPR | HIPAA | HITECH | Security Control Implementation & Assessment | Security Policy & Standards Development | Compliance Automation & GRC Tooling | Audit Readiness & Remediation | Technical Project Management | Stakeholder Engagement | Security Documentation & Evidence Strategy | Training Program Development
