Education

Southern New Hampshire
University, Bachelor of Arts in
Digital Marketing (2020)

Mount Wachusett Community
College, Associate of Science in
Legal Studies (2015)

Certifications

AWS Certified Cloud Practitioner
Google Cloud Digital Leader
Lean Six Sigma
Certified Scrum Master (CSM)

SUMMARY

Security and Compliance Project Manager with 7+ years of experience leading large-scale, cross-functional initiatives across federal, regulated, and high-growth environments. Proven track record owning end-to-end delivery of Continuous Authorization to Operate (cATO) and ATO modernization programs, including automation of assessment, evidence collection, and governance workflows aligned to NIST SP 800-53 Rev. 5 and FISMA Moderate requirements. Known for turning complex regulatory mandates into executables programs that reduce authorization timelines, reclaim engineering capacity, and scale across organizations. Brings a strong blend of program leadership, stakeholder management, delivery rigor, and technical fluency to security and compliance initiatives.

EXPERIENCE**GRC SPECIALIST / RMF SUBJECT MATTER EXPERT**

Aquia Inc. | 2024 - Present

- Owned project management for a large-scale Continuous Authorization to Operate (cATO) initiative supporting the United States Patent and Trademark Office (USPTO), coordinating cross-functional teams across security, engineering, platform, training, and agency stakeholders to deliver NIST SP 800-53 Rev. 5-aligned compliance outcomes for cloud-based FISMA Moderate systems
- Planned and tracked the transformation of a manual, documentation-centric ATO process into an automated, real-time compliance program, driving a ~50% reduction in time-to-ATO and reclaiming ~50% of security and engineering capacity previously consumed by manual evidence collection
- Managed delivery of USPTO's first automated assessment capability, managing scope, milestones, dependencies, and stakeholder alignment for 2,784 AWS control mappings, leveraging AWS Audit Manager and API-driven evidence collection to replace manual assessment workflows
- Oversaw the production, review, and delivery of 2,784 control implementation statements, coordinating secure AI-enabled tooling, reviewers, and validation cycles to compress an estimated 8 months of effort into 6 weeks while maintaining audit readiness and assessment defensibility
- Directed creation of a program-wide control inheritance data model spanning 9 common control providers and 348 NIST 800-53 Moderate baseline controls, ensuring consistency, reuse, and traceability across systems while reducing duplication and rework
- Facilitated the design, documentation, and automation of 20+ GRC workflows supporting continuous compliance, including control monitoring, evidence lifecycle management, POA&M governance, assessor engagement, and authorization readiness across the full system lifecycle

EXPERIENCE (CONTINUED)

GRC SPECIALIST / RMF SUBJECT MATTER EXPERT (CONTINUED)

Aquia Inc. | 2024 - Present

- Led cross-functional integration of compliance tooling and telemetry, coordinating teams responsible for AWS Audit Manager, RegScale GRC, QRadar SIEM, Axonius inventory, and legacy CSAM data migration to deliver a unified, scalable evidence automation architecture
- Led and managed a dedicated GRC training team, setting program vision, delivery milestones, and quality standards while aligning curriculum, knowledge management, and technical enablement labs to cATO program objectives and operational readiness goals
- Served as the primary program lead and escalation point for assessors, auditors, and federal stakeholders, managing timelines, risks, dependencies, and remediation planning to maintain authorization momentum
- Provided continuous project-level risk management, balancing regulatory requirements, delivery constraints, and stakeholder priorities to keep the cATO initiative on schedule and aligned with agency mission needs

SENIOR PROJECT MANAGER

Mindex Technologies | 2023 - 2024

- Managed delivery of complex, multi-workstream software and compliance-adjacent initiatives across diverse client portfolios
- Led process improvement and operational maturity efforts in regulated and enterprise environments
- Coordinated cross-functional teams spanning engineering, security, product, and client stakeholders
- Implemented governance structures to improve delivery predictability, risk visibility, and accountability

TECHNICAL PROJECT MANAGER

ScaleSec | 2019 - 2023

- Led security and compliance programs for cloud-native and SaaS clients across FedRAMP, SOC 2, PCI DSS, and NIST CSF
- Drove gap assessments, remediation planning, and audit readiness from kickoff through authorization
- Acted as the primary liaison between clients, auditors, and engineering teams
- Built and scaled internal project management and delivery frameworks for a growing cloud security consultancy
- Oversaw portfolios of concurrent engagements while maintaining high client satisfaction and audit success rates

SKILLS

Governance, Risk & Compliance (GRC) | Risk Management Framework (RMF) | Continuous Authorization to Operate (cATO) | NIST SP 800-53 Rev. 5 | NIST Cybersecurity Framework (CSF) | FedRAMP | SOC 2 | PCI DSS | GDPR | HIPAA | HITECH | Security Control Implementation & Assessment | Security Policy & Standards Development | Compliance Automation & GRC Tooling | Audit Readiness & Remediation | Technical Project Management | Stakeholder Engagement | Security Documentation & Evidence Strategy | Training Program Development
