Education

Southern New Hampshire
University, Bachelor of Arts in
Digital Marketing (2020)

Mount Wachusett Community
College, Associate of Science in
Legal Studies (2015)

Certifications

Certified Scrum Master (CSM)

Lean Six Sigma

AWS Certified Cloud Practitioner

Google Cloud Digital Leader

SUMMARY

Civic Tech Industry Expert with 7+ years of experience supporting software delivery in regulated and enterprise environments, overseeing Quality Assurance (QA) and User Acceptance Testing (UAT) at the program level. Experienced in coordinating manual testing efforts, developing test plans and acceptance criteria, validating release readiness, and supporting configuration and rollout of complex platforms. Known for clear documentation, strong communication, and close collaboration with engineers, product teams, and end users to ensure features meet requirements and are ready for release.

EXPERIENCE

PROJECT MANAGER, RMF SUBJECT MATTER EXPERT

Aquia Inc. | 2024 - Present

- Served as RMF SME and Project Manager for a large-scale Continuous Authorization to Operate (cATO) program, coordinating delivery across engineering, security, platform, training, and agency stakeholders
- Oversaw Quality Assurance (QA) and User Acceptance Testing (UAT) for the entire cATO program, establishing testing strategy, schedules, and acceptance criteria to ensure features, workflows, and integrations were production-ready
- Designed and managed program-wide UAT processes, including creation of test plans, test cases, acceptance criteria, and execution timelines aligned to real-world user and assessor workflows
- Coordinated and monitored manual testing efforts across multiple teams, validating system functionality, configurations, and integrations prior to release
- Led configuration and rollout of a new GRC platform, coordinating requirements gathering, environment setup, workflow configuration, and validation with engineers, platform teams, and end users
- Reviewed requirements, designs, and configurations to identify testable criteria, risk areas, and gaps early in the delivery lifecycle
- Tracked defects, testing risks, and validation outcomes, providing clear reporting and release readiness updates to technical teams and federal stakeholders
- Used GitHub to collaborate with engineers, track issues, and support QA and UAT workflows throughout development and release cycles
- Supported release readiness by coordinating retesting, fix validation, and final sign-off across program deliverables
- Authored and maintained technical and user-facing documentation supporting system use, testing, and operational handoff

EXPERIENCE (CONTINUED)

SENIOR PROJECT MANAGER

Mindex Technologies | 2023 – 2024

- Led Quality Assurance (QA) and User Acceptance Testing (UAT) for the Mindex Integration Platform (MIP), partnering closely with engineers and end users to validate platform functionality and integrations
- Created and led UAT programs for MIP features and client implementations, including development of test plans, test scenarios, and acceptance criteria aligned to real-world integration workflows
- Oversaw execution of manual testing cycles for MIP enhancements, tracked defects, and reported testing status, risks, and release readiness
- Facilitated feedback loops between end users, integration engineers, and product stakeholders, ensuring issues, edge cases, and usability concerns were clearly documented and addressed
- Supported release decision-making by validating fixes, confirming acceptance criteria were met, and coordinating retesting prior to deployment

TECHNICAL PROJECT MANAGER

ScaleSec | 2019 – 2023

- Led cloud security, compliance, and risk remediation programs across healthcare, financial services, and SaaS clients
- Managed SOC 2, PCI, NIST Cybersecurity Framework (CFS), and RMF compliance initiatives from gap assessment through remediation
- Partnered closely with security engineers to prioritize vulnerabilities and compensating controls
- Coordinated third-party risk reviews, evidence collection, and audit preparation
- Created client-facing and executive security posture reporting

SKILLS

Quality Assurance & Testing: Manual / Functional Testing, User Acceptance Testing (UAT), Test Plan & Test Case Development, Defect Tracking & Test Reporting, Release Readiness & Go/No-Go Support

Collaboration & Tooling: GitHub (issues, collaboration, documentation), Jira / ticket-based workflows, SharePoint / Confluence-style documentation, Cross-functional collaboration with engineers & end users

Documentation & Analysis: Requirements review & validation, Acceptance criteria definition, User workflow analysis, QA documentation & reporting
